

# Press Release

## New Actuator range extended

New high torque Actuators up to 15kN have been added to Hora's intelligent linear actuator range. Hora linear actuators adapt quickly and easily to all kinds of plant configurations.

A wide range of adjustment capabilities make these actuators suitable for universal application. The actuators also offer extensive adaptation possibilities for combining with a very wide range of valve makes and provide economic advantages in installation, commissioning and stock holding.

Special features include:

- o Automatic self-adjustment at initial operation
- o Wear-free travel measuring system
- o Input signal freely adjustable 0..10Vdc, 2..10Vdc, 0..20mA or 4..20mA
- o Output signal freely adjustable 0..10Vdc, 2..10Vdc, 0..20mA or 4..20mA in 3-point and continuous operation
- o End position: load dependent
- o Actuating time, hysteresis and end position freely adjustable
- o Permanent storage in EEPROM memory; value can not be lost
- o Wire break recognition in 2..10Vdc and 4..20mA operation
- o Fault recognition in continuous operation
- o **Frost safety function**
