For the Best in
Control Valves & Sensors

Do you want to offer your clients the highest energy efficiency possible?

DIN EN 15232 Class A - Energy efficient Room Automation

❖ **NEW** The European standard EN 15232 sets the standard for building automation, specifying for the first time a list of room and building automation and management methods which influence the energy efficiency of buildings. Spega's room automation system enables you to meet the demands of a modern building such as energy efficiency, flexibility of use and ergonomics. The system ranks as one of the most comprehensive and functional of its kind and also complies with the most stringent requirements of EN 15232 and VDI 3813.

Sustainable, Adaptable, Cost and Energy efficient Class A.
